- Non-Comedogenic
- Paraben Free
- Fragrance Free
- Non-Acnegenic

Belloccio is an All In One System

Apply your primer, foundation, blush, bronzer and highlighter within minutes! There are foundation shades ranging from the fairest to the deepest skin tones. You are guaranteed to find your perfect match!

QUICK START

1. Connect the hose to the airbrush (A) and the compressor (B)
2. Connect the AC Adaptor (C) to the compressor (B) and plug the adaptor into an electrical outlet. The on/off and mode switches will light up indicating the compressor is ready to go.
3. Locate the mode selection switch, it controls the mode (or air flow) - light, medium or high. The makeup goes into the gravity feed cup, the trigger controls the flow of air and makeup

Find your perfect match!

To find your perfect match, place each of the four colors from your kit on your cheek and jaw line so you can be sure the foundation matches both your face and neck. If you fall in between 2 colors, you can mix them together in your airbrush cup by back-bubbling.

How To Apply Airbrush Makeup

1. After shaking the makeup bottle, place 6-8 drops or as many drops as desired into the airbrush cup.
2. Hold the airbrush like a pen and pull the trigger back with your index finger.
3. Keep airbrush 6-8 inches from face while continuously moving airbrush in a circular motion.

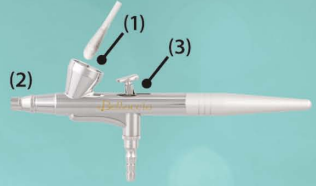

Apply in this Order:

- Anti-Aging Moisturizer
- Foundation
- Highlighter
- Bronzer
- Blush

How To Clean Your Airbrush

1. Add several drops of cleaner to the cup (1) and hold a cloth or index finger on the nozzle (2) pull back the trigger (3) to create a "back bubble". Spray onto a tissue until cleaner is removed. Dry the cup with a cotton swab.

2. Expose the needle (4) by twisting off the back end or "handle" (5) of the brush. Unscrew, but do not remove, the "needle chucking nut" (6) which holds the needle in place.

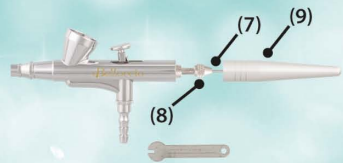

3. Gently remove the needle and clean with a tissue.

4. Using a cotton swab, add 2 drops of cleaner to clean any makeup residue off of the cap.

5. Gently replace the needle (7), tapping the end to make certain it is properly inserted. Tighten the needle chucking nut (8). Then replace the handle (9).

Anti-Aging Moisturizer

A natural oil-free primer regulates shine while allowing makeup to stay vibrant all day.
